RE - This week we had a visitor looking at our RE learning with us. We explored a psalm that made us question why God has made things in certain ways. We explored the nature around us and how it is different to us and in what ways. We drew these altogether into a new psalm. Here is a small sample:

As I looked at the trees, I wondered why they can't talk or move like me

As I looked at the clock and time, I wondered why it is big and mine

As I looked around at grass, I wondered why it was green

English - We have continued to use and explore Language through Colour this week. We have harvested language to use in a Traction Man story of our creating, we then created a story mountain to structure our ideas. Next we will map out the story before writing them to share with each other and home.

Maths - We have continued to explore multiplication this week. We have been able to use arrays successfully to show multiplication visually. The Elves were able to create rows and groups of different amounts that show that multiplication can be done in any order.

Topic - We have begun to prepare for Enterprise week in Topic. We have linked our toy topic into the items sell and have begun to build and develop our own toys for sale. The Elves discussed what toys we could make in school and tried to find Victorian Inspired toys as well.

Next week is Enterprise Week. We will be selling our toys and games afterschool Monday to Friday. We hope you will support the children and all their efforts to make Some amazing products.

I would also like to take this time to congratulate Elves for coming THIRD in the Attendance race this week with 97%!! WELL DONE AND KEEP GOING!

As always please do not hesitate to talk with me about anything at all, I am available most days for a chat.
